

Dance to Tell!

Read.

Bees dance to tell other bees about places they find. They find places for hives. They find places with flowers. Bees like flowers because they get food from them. How a bee dances tells where a place is. If a bee dances in a circle, the place is near. If a bee dances in a figure eight, the place is far away. Bees can say a lot without talking!

Circle **yes** or **no**.

- | | | |
|--|-----|----|
| 1. Bees dance only for fun. | yes | no |
| 2. Bees tell other bees things by dancing. | yes | no |
